SUMMARY

Generative AI and Machine Learning Engineer with **3 years** of **industry experience** who is an **AWS certified Machine Learning Associate**. Strong track record of deploying **full-stack AI applications**, and **engineering pipelines** for **large scale structured and unstructured data**.

Key Skills: Generative AI, Machine Learning, Data Science, Python, TensorFlow, PyTorch, AWS, ETL, Full Stack.

WORK EXPERIENCE

Sr. Software Engineer – Agentic AI, NASDAQ, St. John's, NL May 2026 – Current

- Architect an end-to-end, production-grade pipeline for building and deploying AI agents
- Engineer data preprocessing and prompt workflows that standardize agent development across the team.
- Build deployment infrastructure that lets developers ship agents with tools and skills in minimal setup.
- Develop AI agents on AWS AgentCore for Verafin's Agentic AI Workforce in BSA/AML compliance.
- Optimize a production agent to improve specificity and recall and reduce response latency by 50%.

Generative AI Associate, Innodata Inc., Toronto, ON Aug 2025 – May 2026

- **Evaluated** and **rated AI model** outputs for **quality, relevance, and accuracy** to ensure **alignment** for **Meta**.
- **Contributed** to **open-source tools** like **Redlite** for **testing toxicity**, and other metrics on various **benchmarks**.
- Supported **dataset development** through **data collection** and **augmentation**, reducing model overfitting.

SKILLS

- **Programming Languages:** Python, Java, C++, JavaScript, SQL, Kotlin.
- **Domains:** Generative AI (LLMs & Diffusion), Machine Learning, Data Science.
- **Frameworks:** TensorFlow, PyTorch, Keras, QT Framework, Flask, Django, FastAPI, PySpark, NextJS, AuthJS.
- **Libraries:** Pandas, NumPy, Matplotlib, LangChain, Sci-kit Learn, OpenCV, Pillow, Selenium, Beautiful Soup, Gradio.
- **Platforms:** Linux, Windows, MacOS, AWS.
- **Tools:** Tableau, Power BI, Docker, Jenkins, Git, Jira, Stable Diffusion.

EDUCATION

MASc, Computer Engineering, Memorial University of Newfoundland, Canada 2024

BEng, Information Technology, RGCER, India 2021

PROJECTS

Auto Express [Gen AI, Active Users, Live Site]  Jan 2024 - May 2024

- Launched an **open-source application** that **renders 28 facial expressions** on any face using **Stable Diffusion**.
- Created **inpainting** workflows to perform **localized feature changes** guided by **finetuned YOLOv8**.
- Result is a **one-click solution** for **chatbot emotion display**, **optimizing** the process by **91.67%**.

SD-Parsers [Gen AI, NPM Package, Live Site]  Jan 2024 - May 2024

- Launched an **open-source Typescript node package** to extract **AI generation metadata** from images.
- Deployed a live site for seeing the package and api in action using **express**.
- The parser is now **available online as api**, and **as a package**, and supports **multiple generation sources**.

3T Chat [Gen AI, Live Site]  Jul 2025 - Jul 2025

- Launched a serverless **LLM chat service** using **NextJS** with **my personality** in under **2 hours** on **Vercel**!
- Implemented **file upload functionality** using blob storage, **managed PostgreSQL** instance for user Auth.
- Built an **agent** to get data from **GitHub repo api** and **pdf parsing** Resume parsing.

- Developed a custom **parser** for **Polar files** from the **Wamos II radar system** using **NumPy**, and **matplotlib**.
- Enhanced **accessibility** by **encoding data** into **PNG** format and **embedding radar data** using **Pillow**.
- Designed a **Hybrid Neural Network** consisting of **CNN and MLP** in **sci-kit learn** to estimate wave height.

CERTIFICATIONS

AWS Machine Learning Associate	2025
IBM Data Science Professional Specialization	2019
IIT Madras Programming, DSA Using Python	2019
